“Watch here for advancing technological and aeronautical Information from Tower Aerospace”

“Safety and Environmentally Compatible Materials are Paramount in Today’s Aviation/Aerospace Industries”

INTERNATIONAL TRAINING UPDATE

Since 2005 the Aviation and Space industries have aligned themselves into one seamless process of advanced manufacturing processes; impacting large and small aircraft and spacecraft manufacturing, repair and overhaul, with quality assurance being the upper most important topic regarding functionality and flight safety.

Zero tolerance is now the norm. Support engineering has taken on advance materials training and ambient intelligence training such as advanced computerized 3D and other assembly and test processes regarding advanced equipment and human interface, to ensure continuous airworthiness flight safety.
